iPP315

The multi-payment PIN Pad that simplifies checkouts

- Secure payment acceptance at checkout

- Accepts EMV, magstripe and NFC/ contactless payments quickly and easily

- Connects with Ingenico Desk series terminals with a single USB cable

security   **smartcard**   **magstripe**   **contactless**   **color display**

The iPP315 enables secure and fast checkouts, by accepting all electronic payments, including EMV, magstripe and NFC/contactless.

Highest Security
The iPP315 is PCI-PTS 4.x certified and meets all security requirements. It ensures secure data and application management and enables highly secure transactions for merchants. The optional PIN privacy shield provides additional security and confidentiality for consumers for PIN entry.

Total Payment Flexibility
The iPP315 accepts all forms of electronic payments, including EMV, magstripe and NFC/contactless.

Easy Connectivity
The iPP315 easily connects with Ingenico's Desk series terminal using a single USB cable.

Maximum Ease of Use
Among the world's smallest and lightest devices, the iPP315 is designed for easy handling and daily use. A backlit keypad and vivid color display make PIN entry and payment operations highly visible and intuitive. Large keys and an audible buzzer simplify transactions while reducing PIN entry errors. In addition, clear visual indicators facilitate NFC/contactless payments.

Operating System
The iPP315 leverages Ingenico's Telium 2 platform, developed from over 30 years of experience in the payment industry. Secure, fast, fully scalable and easy to integrate, Telium 2 is the world's most reliable operating system for payment services.
